Application Serial No. 10/606,209 Attorney's Docket No.:06618-476003

Amendments to the Specification:

Please replace the paragraph beginning at page 7, line 6 with the following amended paragraph:

The central shaft is preferably a constant diameter cylindrical rod. However, the shaft can alternatively be a varied diameter cylindrical rod or any other element that his smooth and does not include sharp edges thereon. For example, the cylindrical rod could be formed with an outer surface that has bumps that have rounded edges as shown in Figure 6.
